The writer first saw this from PHE Vaccine Surveillance reports and published his findings to PHE themselves AND on my website and in The Expose, on 2021October10.

'The Science' has now been established by the Cleveland Clinic. Genetic vaccines damage your immune system and make you not less likely but more likely to be infected with Covid.

Not only that but they have horrendous side effects on the cardiovascular, neurological and reproductive systems as well.

They are nothing short of mandatory progressive euthanasia.

CDC All-Cause Mortality Data shows that every year, every vaccinated person becomes more and more likely to die at a rate of 7% PER JAB PER YEAR. That is a slow-acting genetic poison.

If people were recovering from the 1st jab, then it would not be having precisely the same effect as the 5th jab (namely a 7% increase in mortality). This is the long term problem. People are not recovering from the damage done by the shots in terms of excess mortality.

So taking 2021 as the base line, a 5 dosed person would be 350% more likely to die in 2031 and 700% more likely to die in 2041 and 1050% more likely to die in 2051 than an unvaxxed person. It is just like compound interest.

Using this result, we can calculate the loss in life expectancy for a 30 year old male as follows... The life expectancy of a 30 year old unvaxxed male in the UK is around 80 years. So he can expect another 50 years of life.

In statistical terms, half of his cohort are dead by 80. The life expectancy of a 30 year old quintuply vaxxed person in the UK is 56 years. Assuming UK males respond to the vaccines in the same way as US people. Alternatively quintuply vaxxed US 30 year old males have likewise lost 24 years of life expectancy.

UK life expectancy data is from Statista. In the table below we add the extra 7% mortality per jab per year to the 2020 UK levels shown in Column2. So in a 5 year period, the average increase in expected mortality would be –

$(0\% + 35\%)/2 = 17.5\%$ from one jab

$(0\% + 70\%)/2 = 35\%$ from two jabs

$(0\% + 105\%)/2 = 52.5\%$ from three jabs

$(0\% + 140\%)/2 = 70\%$ from four jabs

$(0\% + 175\%)/2 = 87.5\%$ from five jabs

That is the price you pay for trusting the NHS, trusting the government and trusting the BBC and the Main Stream Media.

That is what Media like the Expose have been trying to prevent.
